

ugcgo.ai

Launch Roadmap

Zero Budget Strategy | March 2026

Based on: Reddit, Product Hunt, X (Twitter), Indie Hackers, market research

01 CURRENT STATE

Where ugcgo.ai is right now

	Landing page (HTML/CSS/JS)	READY
	Animations, themes, responsive	READY
	Waitlist form	NOT CONNECTED
	CI/CD (GitHub Pages)	READY
	Backend / DB / Auth	MISSING
	AI video pipeline	MISSING
	Dashboards / Payments	MISSING

STAGE: Pre-launch. There is a showcase, but no product yet.

02 COMPETITORS (March 2026)

AI UGC market is overheated. But NO ONE is a marketplace.

PLATFORM	PRICE	KEY FEATURE
Arcads	\$100/mo	300+ AI actors, perf ads
HeyGen	\$24/mo	1100+ avatars, voice clone
Creatify	\$39/mo	URL-to-video
MakeUGC	\$49/mo	Cheapest per video (<\$10)
EzUGC	\$49-199/mo	Multi-model (Sora 2, Veo 3.1)
AdStellar	---	Full cycle: UGC + Meta campaigns
Synthesia	\$22/mo	Enterprise, 230+ avatars

YOUR NICHE: "Fiverr for AI UGC" — marketplace, not another SaaS tool

Creators sell skills. Brands get content. Platform takes commission.

03 PHASE 0: PREPARATION (Days 1-3)

Connect email collection + prepare build-in-public content

1	Connect waitlist to Tally.so	30 min	Tally.so (free)
2	Create accounts: X, Reddit, PH, IH	1 hour	---
3	Optimize X profile: bio + link	15 min	---
4	Record first Loom video of landing	1 hour	Loom (free)
5	Write first X thread	30 min	---

FIRST X THREAD TEMPLATE:

I am building ugcgo.ai - the first marketplace for AI UGC creators.

Brands spend \$150-\$2000 per video with human UGC creators.

AI UGC tools cost \$2-20/video, but brands cannot use them.

Solution: marketplace where AI creators sell ready-made content.

Fiverr, but for AI video. Building in public. Follow along!

04 PHASE 1: BUILD IN PUBLIC (Days 4-21)

Goal: 200+ emails in waitlist, 500 followers on X

X (TWITTER) - PRIMARY CHANNEL

Grok-powered algorithm in 2026 promotes small accounts with strong engagement

Morning	Build in public	Day 7. Built creator profiles. What would you add?
Afternoon	Expert content	AI UGC: Arcads \$100/mo. MakeUGC \$49. What if creator does it for \$15?
Evening	Engagement	Brands: how much do you pay for UGC video now?

REDDIT - SECONDARY CHANNEL

Rule 90/10: 90% useful content, 10% mention product

r/Entrepreneur	4.9M	Market research post
r/SideProject	600K+	Show my project
r/AlphaAndBetaUsers	---	Looking for beta testers (promo OK)
r/roastmystartup	---	Roast my landing = feedback + attention

REAL CASE: Indie hacker 0 -> 2400 followers in 4 months -> launched at \$8K MRR

05 PHASE 2: MVP LAUNCH (Days 22-45)

Minimum viable marketplace. Cost: \$0 (Supabase Free + Vercel Free)

BUILD:

Registration	Email + Google OAuth	Supabase Auth
Creator profile	Name, portfolio, skills, price	Next.js + Supabase
Brand brief	Product, style, platform, budget	Next.js + Supabase
Matching	List of creators with filters	Simple UI
Chat	Messaging	Supabase Realtime
Video upload	Creator uploads finished video	Supabase Storage

DO NOT BUILD IN MVP:

- ✗ Payments (manual transfer first)
- ✗ AI generation inside platform
- ✗ Complex search/recommendations

06 PHASE 3: LAUNCH DAY (Day 46-48)

Multi-platform staggered launch. Tuesday/Wednesday/Thursday only.

2 WEEKS BEFORE:

Submit to BetaList (14.9% signup conversion)

Get 5-10 creators to fill profiles (marketplace must not be empty)

Prepare Product Hunt assets: logo, screenshots, GIF, demo video

LAUNCH DAY TIMELINE:

00:01 PT	Product Hunt launch + maker comment
00:15 PT	X post: We just launched!
00:30 PT	Email to entire waitlist
06:00 PT	Hacker News: Show HN
08:00 PT	Reddit: r/SideProject, r/AlphaAndBetaUsers
10:00 PT	Indie Hackers post
ALL DAY	Reply to EVERY comment on Product Hunt

PH ranks by ENGAGEMENT QUALITY, not upvote count. Active users' votes weigh more.

07 PHASE 4: FIRST 100 USERS (Days 49-90)

"Do things that don't scale" - Paul Graham

CREATORS

Find 50 AI UGC accounts on X/TikTok

DM each: "Saw your AI videos - fire.

We have a marketplace. Free access."

Join AI Discords (Midjourney,

RunwayML, HeyGen communities)

BRANDS

Find marketers on X/LinkedIn complaining

about UGC costs

Offer: "First order free - we'll show

how AI UGC saves 90% budget"

DM 100 DTC brands (Shopify stores)

TARGET METRICS:

Signup conversion

2-4%

Activation rate

30-50%

Traffic growth

10-20%/month

Waitlist -> Active user

15-25%

08 ACTION PLAN: WHAT TO DO RIGHT NOW

No survey needed. Market is validated. Time is the enemy.

TODAY (30 min)

Connect Tally.so to waitlist form

Create/optimize X account

TOMORROW (2 hours)

Record demo video (Loom/OBS, 60-90 sec)

Write first X thread

First Reddit post

WEEKS 1-3

Build in public (3 posts/day on X)

Collect waitlist emails

Start building MVP (Next.js + Supabase)

WEEKS 4-6

Launch MVP

Onboard 10 creators manually

Product Hunt launch day

WEEKS 7-12

100 users via direct outreach

Iterate product based on feedback

First revenue

09 FREE LAUNCH PLATFORMS

\$0 budget. Organic acquisition: ~\$150/user vs \$802 via paid ads.

Product Hunt	5-10K visitors/day for #1	Launch day
BetaList	14.9% signup conversion	2 weeks before launch
Hacker News	Tech audience, viral potential	Launch day
Indie Hackers	Founders community, feedback	After launch
Reddit	Massive audience (millions)	Build in public phase
X (Twitter)	Long-term compounding growth	From day 1
